

TransContinental

SEEDED BERMUDAGRASS

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Florida

Variety information

Description:

Transcontinental bermudagrass was developed by Pure-Seed Testing, Inc. Transcontinental has a medium-dark green color and medium leaf texture. This seeded bermudagrass forms a dense turf and has very good winter survivability. Transcontinental has excellent heat, drought, and wear tolerance.

Geographical Adaption:

Transcontinental is adapted to the Transition Zone and subtropical and tropical climates. It is adapted to a wide range of soil types and pH. Recommended seeding rate for hulled seed is 1-2 lb/1000 ft² (50-100 kg/ha). Fertilize at 0.5-1 lb N/1000 ft²/growing month (25-50 kg/ha); mow at 0.375-2.5" (1.0-6.25 cm), depending on turf use.

Applications:

Transcontinental may be used for sports fields, golf course tees, roughs, fairways, lawns, parks, sod production, cemeteries, and soil stabilization. Transcontinental performs best in full sun.

PRODUCT FEATURES

Drought Tolerance	● ● ● ● ●
Heat Tolerance	● ● ● ● ●
Salt Tolerance	● ● ● ● ●
Wear Tolerance	● ● ● ● ●
Winter Survival	● ● ● ● ●
Seeding Rate	7-10 lbs /1000sq. ft (294-490 kg/ha)
