

Kentucky Bluegrass

ENDURANCE

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Endurance is the latest compact, elite type Kentucky bluegrass released by Pure-Seed Testing. Endurance is a hybrid tracing to Midnight and Northstar. The variety was selected for overall turf quality, spring green-up, and exceptional rust resistance. Endurance has good overall disease resistance allowing this variety to “ENDURE” high levels of stress across a wide geographical range. Endurance was in the top statistical group for all NTEP locations. It has good resistance to salt, dollar spot, summer patch and pink snow mold.

Applications:

Endurance is an elite bluegrass for sod production. It mixes well and compliments perennial ryegrass and tall fescue. Endurance can handle low mowing .50” (1.25 cm.) and is a perfect fit for any high-end turf situation. Endurance is unique in that it is an elite bluegrass that can perform under low maintenance conditions, unlike traditional Midnight-type varieties, Endurance has exceptional leaf spot and rust resistance.

Geographical Adaption:

Endurance performs consistently well throughout the typical cool season zones and into the transition zone. It can be utilized as a component with perennial ryegrass to enhance the seasonal turf performance. Endurance has wide adaptability with proven success across various continents. Seeding rates typically range between 2-3 lbs./1,000 sq. ft (97-146kg/ha). Normal establishment is between 14-21 days under good growing conditions. Fertilize at 3 lbs N/1000sq.ft./year.

PRODUCT FEATURES

Spring Green-Up	● ● ● ● ●
Stem Rust	● ● ● ● ●
Genetic Color & Density	● ● ● ● ●
Sod Production	● ● ● ● ●
Turf Quality	● ● ● ● ●
Seeding Rate	2-3 lbs /1000sq. ft (97-146 kg/ha)
