seeded bermudagrass

PurePro[®] Seeded Bermudagrass

PurePro Seeded Bermudagrass is a blend of the market's best bermuda varieties producing attributes that meet the most demanding conditions. This unique blend was developed to withstand high levels of foot traffic, recover quickly from injury, and provide the ultimate playing surface.

Germination occurs in 7-14 days under optimal temperatures (soil over 65°F / 18°C). Within 8-12 weeks, PurePro can be ready for play. Challenging conditions are no match for PurePro. This elite bermudagrass produces an excellent playing surface even under the stress of poor water quality, drought, and heavy traffic.

PurePro can be overseeded easily with perennial ryegrass for superior results in the winter months. Due to PurePro's aggressive growth habit, it will transition out of overseeding quickly.

PRODUCT FEATURES:

- Perfect for interseeding
- Deep rooting
- Early spring green-up
- Great color retention in the fall
- Excellent turf density
- Quick establishment
- Excellent salt tolerance
- Rapid recovery from injury
- Disease tolerant
- Superior playing surface for the world's most elite athletes

SEEDING RATE:

The recommended seeding rate is 1.5-2.5 lbs. per 1000 ft² (7-12 g/m²).
