

DESERT MOON

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Desert Moon is the newest elite Kentucky Bluegrass from Pure-Seed Testing, Inc. It has ranked in the top tier of trials for the past eight years for disease resistance, turf quality, drought tolerance, spring green-up, and shade tolerance. Turfgrass Water Conservation Alliance has qualified Desert Moon as drought tolerant. Desert Moon's outstanding performance for many traits distinguishes it from other Kentucky bluegrass varieties.

Applications:

Desert Moon has excellent winter color, spring green-up, and summer performance, making it a top selection for year-round quality turf. Desert Moon excels in disease resistance, density, and has bright green color, making it a perfect option for an elite KBG blend. This high-quality variety is a preferred choice for sod production.

Geographical Adaption:

Desert Moon is adapted to well-drained soils with pH of 5.5-7.5. Desert Moon has performed well from temperate climates to the Transition Zone of the United States and in Europe and China. Fertilize at 3-5 lb N/1000 sq. ft/year. Maintain at 0.5"-2.5" mowing height. Irrigate deeply and infrequently in absence of rainfall as needed.

PRODUCT FEATURES

Drought Tolerance	● ● ● ● ●
Spring Green Up	● ● ● ● ●
Stem Rust	● ● ● ● ●
Winter Color	● ● ● ● ●
Seeding Rate	2-3 lbs /1000sq. ft (125 kg/ha)
