FAIRWAY CREEPING
BENTGRASS™

CREEPING BENTGRASS

PureWay™ Fairway

Powered by Tee-2-Green, PureWay is a blend of the latest innovations in creeping bentgrass for tees and fairways. This blend delivers unmatched toughness with shade tolerance, salt tolerance and disease resistance. The ability to establish quickly and germinate in cold conditions makes it ideal for interseeding. A robust root structure supports a healthy, hearty plant that can tolerate less water and fertilizer making it easier to manage compared to other options on the market. PureWay was designed to thrive on fairways, providing the ultimate experience for both superintendents and players.

PRODUCT FEATURES

- Quick Establishment
- Exceptional Interseeding
- Shade Tolerance
- Salt Tolerance
- Disease Resistance
- Robust Root Structure
- Optimal Playing Surface

SEEDING RATE:

Recommended seeding rate is 1 to 1.5 lbs. per 1,000 sq. ft. for new plantings and 0.1 to 0.25 lbs./1,000 sq. ft. for interseeding.
