

Tall Fescue

LIFEGUARD

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Lifeguard is a new and improved tall fescue variety developed by Pure-Seed Testing, Inc. It is a dark-medium green cultivar with excellent summer turf performance. In the 2018 CTBT (Cooperative Turfgrass Breeders Test) data, Lifeguard consistently ranked in the top statistical groups. Lifeguard stands out in brown patch resistance, shade tolerance, gray leaf spot resistance and excellent heat and drought tolerance.

Applications:

Lifeguard is a great choice for sod production, lawns, parks, sports fields and golf courses. With its strong disease resistance, it will require less inputs while staying green and healthy all year round. Lifeguard is a TWCA (Turfgrass Water Conservation Alliance) qualified variety which proves its drought tolerance by using up to 40% less water.

Geographical Adaption:

Lifeguard performs well in the Transition Zone and temperate climates. It is adapted to a wide range of soil types and pH. Recommended seeding rate is 5-8 lbs/1000 ft² (245-390 kg/ha). Fertilize at 3-5 lbs N/1000 ft²/yr (145-245 kg/ha); mow at 1.5-3.0" (4-8 cm); irrigate deeply and infrequently.
