Festuca rubra fallax

Tufted Blue Fescue

POWDER BLUE

Variety information

Description:
Powder Blue is Pure-Seed Testing's only tufted blue fescue variety and stands out for its exceptionally unique powder blue color. It demonstrates strong tolerance to shade, drought, and salt, making it a versatile option for challenging environments. This variety maintains its distinctive coloration year-round and is rhizomatous, enabling it to spread naturally and fill in thin areas over time.

Applications:
Beyond its aesthetic strengths, Powder Blue also delivers reliable performance in both landscape and low-input settings. It's fine texture, compact growth habit, and resilience under stress make it suitable for ornamental plantings, groundcover, and environmentally sensitive projects. With proper establishment, Powder Blue forms a dense, durable stand that enhances visual appeal while reducing long-term maintenance needs.

Geographical Adaption:
Powder Blue is well-adapted to temperate climates. Fertilize at 1-3 lb N/1000 sq. ft/year. Mowing height 0.5-3.5". Irrigate deeply and infrequently in the absence of rainfall.

PRODUCT FEATURES

Shade Tolerant	● ● ● ● ○
Drought Tolerant	● ● ● ● ○
Salt Tolerant	● ● ● ● ●
Rhizomatous	● ● ● ○ ○

Seeding Rate 2-4 lbs /1000sq. ft (170 kg/ha)
