

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

GLX Star tall fescue is a TWCA Qualified turfgrass variety that has outstanding gray leaf spot resistance (GLX), brown patch resistance, billbug resistance and excellent turf quality. Through years of rigorous testing, it has been third-party validated by TWCA to be top-rated in drought tolerance. GLX Star tall fescue is well-suited for a variety of climates due to its heat tolerance, drought tolerance, and summer disease resistance.

Applications:

GLX Star is adapted for lawns, golf course roughs, cemeteries, parks, sod production, sports fields, roadsides, and slope stabilization. Its drought tolerance, turf quality, and disease resistance make GLX Star especially well-suited for residential or commercial lawns and low-maintenance turf areas. GLX Star performs well in sun and shade.

Geographical Adaption:

GLX Star performs well in the US Transition Zone and in temperate climates. It is adapted to a wide range of soil types and pH. Recommended seeding rate is 5-8 lb/1000 ft² (275-390 kg/ha). Fertilize at 3-5 lb N/1000 ft²/yr (150-275 kg/ha); mow at 1.5-3.0" (4-8 cm); irrigate deeply and infrequently.
