

Bermudagrass

CHILLY VERDE

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Product information

Description:

Chilly Verde seeded bermudagrass was developed by Pure-Seed Testing, Inc. Chilly Verde has a medium green color and medium-wide leaf texture. This bermudagrass has excellent seedling vigor and rapidly forms a spreading turf with medium shoot density and high root density. Chilly Verde has excellent heat, drought, and wear tolerance. It has shown winter survival in trials in NC, MS, KY, and TX.

Geographical Adaption:

Chilly Verde is well-adapted to the U.S. Transition Zone and subtropical and tropical climates. It is adapted to a wide range of soil types and pH. Recommended seeding rate for hulled seed is 1-2 lb/1000 ft² (50-100 kg/ha). Fertilize at 0.5-1 lb N/1000 ft²/growing month (25-50 kg/ha) and mow at 1-3" (2.5-7.5 cm), depending on turf use.

Applications:

Chilly Verde is an excellent choice for amenity turf areas. It may be used for lawns, sports fields, parks, playgrounds, cemeteries, sod production, golf course roughs, and soil stabilization. Chilly Verde performs best in full sun.

PRODUCT FEATURES

Establishment	● ● ● ● ●
Drought Tolerance	● ● ● ● ●
Heat Tolerance	● ● ● ● ●
Salt Tolerance	● ● ● ● ●
