

FORAGE PRODUCTS

Annual Ryegrass Diploid

Dipper

Adaptation:

DIPPER is a very fast establishing diploid. It has excellent cold tolerance and rust resistance. It is the Annual ryegrass of the stars.

It was developed and proven to have high forage quality related to animal performance. It is a very high yielding cultivar that reaches maturity early. This makes Dipper ideal for spring grazing.

Uses:

Dipper is excellent for spring grazing, green chop, crop, aquaculture rotation, and over-seeding pastures in the South.

Traits:

- Excellent Rust Resistance
- High Nutritional Feed Value
- Excellent Cold Tolerance
- High Yields

Product Packaging:

Technical Summary

Crude Protein:	Excellent
Total Digestible Nutrients:	Excellent
Forage Yields (dry matter):	Excellent
Palatability:	★★★★★
Usage:
