

SUNGOLD

premium tall fescue brand™

THE FOUNDATION OF EXCELLENCE
A research first approach of perfecting turfgrass performance.

Premium Tall Fescue Brand

SUNGOLD™

SUNGOLD is the newest technology in tall fescue developed by Pure-Seed Testing (Rolesville, NC & Canby, OR). Sungold's self-repairing system contains the best and most resilient tall fescue cultivars ever developed by PST. Through applied research trials evaluating all aspects of tall fescue performance, we have chosen only the top-rated varieties to be included in the **SUNGOLD** blend. Careful attention towards disease resistance, particularly brown patch has been a key part of the selection process. Heat and drought tolerance have also played key roles in selecting the strongest varieties to offer in this elite blend. **SUNGOLD** has the added advantage of being endophyte enhanced to offer value-added protection against other pests and disease.

SUNGOLD TWCA™ Turfgrass Water Conservation Alliance

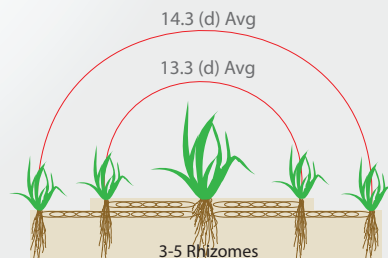

SUNGOLD TWCA has extensive recovery from drought and significant water reducing capabilities. Qualified by the **Turfgrass Water Conservation Alliance**, the components of **SUNGOLD TWCA** have gone through the most rigorous drought tolerant testing to ensure the highest standards for tolerance on the market.

A HEALTHIER TURFGRASS

SUNGOLD has an unbeatable resistance to brown patch and its dense root system gives it excellent performance under stress. Sungold's deep rooting ability gives it greater resilience under reduced irrigation during periods of drought. Improved salt tolerance allows for irrigating with brackish water. **SUNGOLD** provides an entire recovery system, which delivers a beautiful healthy turfgrass solution.

SUNGOLD RST™ RAPID SPREADING TECHNOLOGY

* diagram illustrates increased tillering and rhizome count.

SUNGOLD RST is a proprietary tall fescue/Kentucky bluegrass mix that improves the tillering, disease resistance and overall performance. This mix is ideal for high traffic and low input areas, sod production, and home lawns.
