

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Pro Gold tall fescue was developed by Pure-Seed Testing, Inc. It was selected for drought tolerance, brown patch resistance and overall turf quality. It has exceptional winter color and wear tolerance. Good gray leaf spot resistance and has made the Maryland Virginia list.

Applications:

Pro Gold is adapted for lawns, golf course roughs, cemeteries, parks, sod production, sports fields, roadsides and slope stabilization. Its drought tolerance makes Pro Gold especially well suited for drought stress areas. Pro Gold can withhold good color and turf quality in sun and shady areas.

Geographical Adaption:

Pro Gold performs well in the Transition Zone and temperate climates. It is adapted to a wide range of soil types and pH. Recommended seeding rate is 5-8 lb/1000 ft² (245-390 kg/ha). Fertilize at 3-5 lb N/1000 ft²/yr (145-245 kg/ha); mow at 1.5-3.0" (4-8 cm); irrigate deeply and infrequently.
